SONGS OF THE SEAS

Ensemble & Code

Transposed Score

for the LEAP Ensemble

Song of Fives

Ensemble and Code

Peter Bell

Performance Instructions

Electronics:
Laptop running Sonic Pi.
Ensemble amplified through PA.
Mono input to laptop from mixer: All parts except rhythm section.
Stereo output from audio interface to PA.
Each section is triggered by activating the next buffer in Sonic Pi.

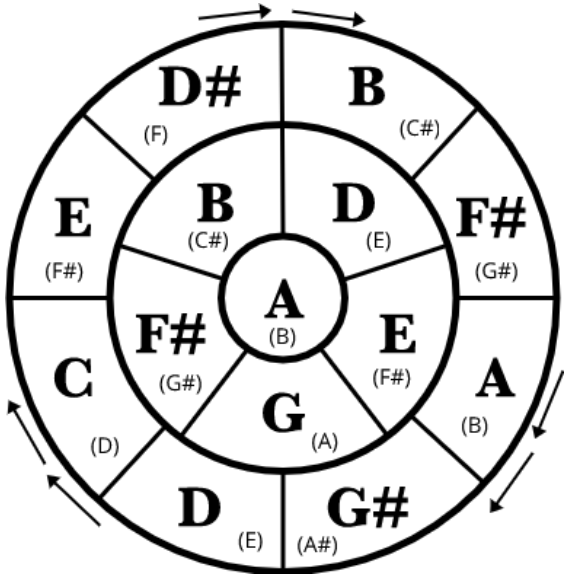
Reading the score:
Section 1 (fig. A)
Figure A is played as written. The electronics are triggered at the start.
The electronics sample fig. A, then generate the rest of the section using the sample.

Section 2 (fig. B & C)
Once section 1 is complete section 2 is triggered.
The Drums repeat the first two bars of fig. C from the begining of the section until all the instruments have entered.
Wind, brass and strings enter gradually, as indicated, playing the circle from the centre.
Each segment of the circle is one quiet held note at the indicated pitch.
The small bracketed pitches are for instruments in Bflat.
The performers follow their own path around the circle moving clockwise and outwards.
Once they have reached the edge of the circle they can play the given musical cell (fig. B), before returning to the centre of the circle.
After all the wind, brass and strings have started playing, the rhythm section plays fig. C through 3 times.

Section 3 (fig. D)
Once the rhythm section has completed fig. C the ensemble moves onto fig. D together.
Fig. D carries on directly from fig. C. The first bar of fig. D is a cue for the other performers to move on.
The rhythm section plays each cell together 5 times unless indicated until the end of the section.
The rest of the ensemble plays each cell through 3 - 5 times as they choose before repeating the last bar until the end of the piece.
It doesn't matter if bars become out of sync (1st beats of bar not lining up) but it is important to keep in tempo.

After section 2 of electronics triggered...

Approx. 20 secs. between each entry...
Violin, Viola (circle) & Kit (fig. C)
Flute
Cello
Clarinet
Brass
Rhythm section (fig. C) - play 3 times



D
Fl.
Play each cell 3 - 5 times
Cl.
Play each cell 3 - 5 times
Tpt.
Play each cell 3 - 5 times
Tbn.
Play each bar 3 - 5 times
Vln.
Play each cell 3 - 5 times
Vla.
Play each cell 3 - 5 times
